### **MARCH 2020**

### **"POTTY" TIME?**

How do you know when your child is ready?

Did you know that if you start potty training too early that it may take longer to train your child? Many children between the ages of 18 and 24 months show signs of being ready but others might not be ready until the age of 3. Ask yourself these questions to see if your child is ready:

- Can your child walk to sit on the toilet?
- Can your child pull down his or her pants and pull them up again?
- Can your child stay dry for up to two hours?
- Can your child understand and follow basic directions?
- Can your child communicate when he or she needs to go?
- Does your child seem to be interested in using the toilet or wearing "big-kid" underwear?

If the answers are mostly yes, your child might be ready. You may want to wait, if your answers are mostly no or if your child is going to experience a major change soon (i.e. moving or new sibling.)

Math Learning Parties for Beaver Run and Pemberton Families

Families participating in the Math Learning Party series will understand and use appropriate activities to build their child's math skills. The math series has our parents focused on learning about numbers, exploring shapes & patterns, measurement, and building math skills.
